Escort Information

Today you will supervise the recovery of a sedated patient. The effects of sedation can alter judgment, memory, walking/balance for up to several hours after the appointment – sometimes more.

Please be in position to directly protect the patient from falling or other types of injury. It is easy for you to be distracted after a period of time and the patient may attempt getting up and walking without assistance and a fall or accident could occur.

The patient should not drive any type of vehicle or operate machinery until the next day and only if they feel fully recovered.

Please be sure the patient takes the prescribed medications as directed. It is easy for a sedated patient to get confused and perhaps take too many medications, or the wrong ones at the wrong interval, etc.

If you have any questions or concerns, please call immediately 303-721-1173 and 911 if urgent.

Thank you for your concern and commitment to the safety of our patient.
